Body Worn Camera

The Paulsboro Police Department utilizes the Axon Body 3 camera system for all patrol use. The cameras serve as useful tools for recording evidence, more importantly, they promote professionalism, accountability, and transparency by documenting officer conduct and public interaction. The Paulsboro Police Department is proud to be one of the first Police Departments in the state of New Jersey to utilize body worn cameras by having them in service since 2014. All Paulsboro Police officers assigned to uniformed patrol wear body worn cameras during their tour of duty, as well as certain officers assigned to specialized units.

Body cameras are worn to enhance community trust and record public interactions in an official capacity. The cameras will be worn on the police officers outermost garment, in the center of the upper body. The body worn cameras will be used in accordance with the New Jersey Attorney General's Directive and Paulsboro Police Department policy.
